

ENVIRONMENTAL POLICY

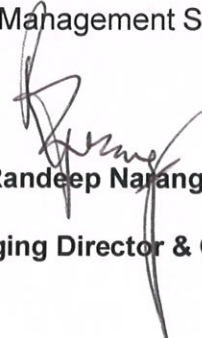

Transrail Lighting Limited be a flagship company for EPC, Power Transmission, Distribution, Lighting Solutions, Railway & Other infrastructures globally.

As a responsible Manufacturing/EPC company, we shall adopt the best practices in order to achieve excellence in environmental performance, in all of our operations.

Towards this end, we shall:

- Adopt appropriate operational practices of clean and green technologies to monitor, control and minimize the impact on environment;
- Comply with all applicable statutory rules / regulations / guidelines and stipulations;
- Communicate, Educate, Motivate and Ensure that the policy is understood, implemented and maintained by the employees and stakeholders to deliver their responsibilities in environmentally responsible manner;
- Create awareness on different avenues of environmental benefits across various sections of society;
- Develop and maintain a highly motivated work force trained for effective management of environment and emergency situations;
- Evaluate and modify environmental management practices considering all applicable regulatory requirements, community concerns and technological advancement.
- Reduce the amount of pollution, particularly greenhouse gas emissions caused by various activities.
- Reduce dependence on fossil fuels (wherever applicable) through the use of renewable energy.
- Focus on energy conservation & energy efficiency methods.
- Develop, adopt, maintain and continually improve Waste Management System.
